The tower also suffered extensive damage from invasions and was destroyed in the earthquakes of 1751 and 1997, but was later rebuilt.

YUMMY!

Traditional Food

Torta al testo

"Torta al Testo", also known as "Crescia Umbra", is a type of flat and low unleavened bread typical of Umbrian cuisine. Based on flour, water, oil, salt and bicarbonate, with a round shape it is cooked on a cast iron plate called "testo" from which it takes its name.

Soft, tasty, with a delicious taste halfway between a Piadina and a Focaccia; it can be eaten alone in lieu of bread or stuffed with meat, cheese and vegetables! A unique goodness that has ancient origins in the peasant countryside as an alternative to the classic leavened bread.

Pasta alla Norcina

Pasta alla norcina is a typical dish of Umbrian cuisine that is prepared with Norcia sausage crumbled in a pan with oil and onion, fresh cream, truffle and pecorino. It is usually prepared with short pasta. If you can't find Norcia sausages, you can use the classic pork sausage, but the final flavor will be less aromatic. The name "alla norcina" derives from the use of the sausages of the master butchers.

Here's how to prepare this ideal first course for Sunday lunch that will conquer everyone.

Pian delle Stelle

Pian di Stelle restaurant is one of the most beautiful places where you can eat traditional food in Nocera. The menu is quite short but here you can eat delicious food made of high-quality ingredients.

The main dish you can taste is Torta al testo and you find very friendly staff.

Angelica Water Spring

Nocera is known for its mineral waters, such as those of the Angelica spring that flows from Bagni, a hamlet of Nocera, a real wellness resort. Angelica Natural Mineral Water is characterised by a balanced content of mineral salts, ideal for those who prefer low-mineral water without sacrificing the benefit of the mineral salts, essential for a correct diet.

Nocera's Fresh Water Springs

Flaminia Water Spring

The Flaminia source was born in Le Case, a hamlet of Nocera Umbra. It is currently the most exploited, as its waters are conducted to the Nocera Scalo plant, where they are bottled and placed on the market under the "Nocera Umbra Flaminia Source" brand.

Angelica Water Spring

The Cacciatore source, also known as the Centino spring, gushes directly from the rock in Schiagni, a hamlet of Nocera Umbra, located on the slopes of Monte Pennino. It boasts particular characteristics of minerality and lightness, and it was used to treat certain pathologies. By the end of the 1940s, the spring was supplied by the Bisleri family. With the bottling activity already started, Felice Bisleri was the first to invest to enhance its productivity. From there on, Bisleri water became known throughout the world and was also exported to America.
